INSTALLATIONS

1. IN-DASH INSTALLATION

Front bezel of this radio is designed for use as a dash trim plate.

1. Attach perforated rear bracket to radio with an attached screw.
2. Remove knobs from shafts by pulling off.
3. Remove front bezel by removing hex nuts on the screw shafts.
4. Position radio thru dash in mounting location, making sure it clears all obstructions. Mount front bezel as a trim plate on the dash. Secure with Hex nuts which are removed in Step 3.
5. Secure rear bracket to firewall with attached screw and nut.

2. UNDER-DASH INSTALLATION

1. Attach perforated rear bracket to radio with an attached screw.
2. Position radio on lip of dash making sure radio is clear of all obstructions. Mark position of holes on side bracket on lip of dash.
3. Drill two 1/4″ holes on lip of dash. Attach radio with attached screws and nuts by side brackets.
4. Secure rear bracket to firewall with attached screw and nut.
