
Fig. 7-1

7-2 Antenna Trimmer

The antenna trimmer is located on the left part of bottom plate of the chassis. (See Fig. 7-1)

8. ADAPTER FOR 24 V POWER SOURCE

1. This model (AT-361) can be installed in a car with 24 V power source by means of AR-20 adapter cord for 24 V power source.

Note: 1) When the pilot lamp is gone, while the set is adapted for 24 V power source with AR-20, replace immediately the broken lamp with specified one (12 V 3 W).

2) Do not leave the pilot lamp gone, because the radio set is possibly broken on account of the excessively high voltage fed to the receiver.

2. Power supply lead wire for magnetic antenna

1) This model is supplied with the power supply lead wire for magnetic antenna. (12V type)

2) When the lead wire is not used, leave the wire as it is.
