AT-361 CIRCUIT DIAGRAM

Notes :

1) Given voltages are standard ones indicated on a tester which has 20KΩ internal resistance.
2) Voltages and currents are measured when there is no signal.
3) ※ mark shows the voltages measured at 530KC.
4) ◉ marked titanium condenser is for temperature compensation.
5) ★ marked resistors are synthetic resin coated resistors.
6) If not specified otherwise, all resistors are 1/6W solid resistors.
