

Radiokes Drum Dials

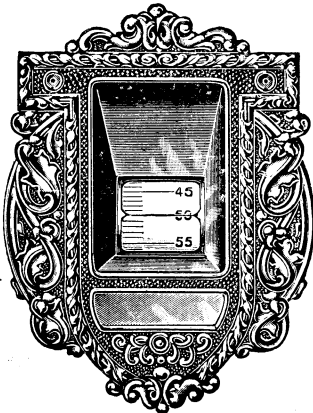

The Drum Dials produced by Radiokes have a distinction which adds dignity to any cabinet. Their use immediately stamps a receiver as one of character and quality. Perfect in operation, artistic in conception, and artistic in their finish, Radiokes Drum Dials can be used appropriately with the highest grade cabinet work and will harmonise with any design. Kindly state if required for clockwise or anti-clockwise Condensers.

SCROLL DRUM DIAL

The Scroll Drum Dial is a beautiful example of craftsmanship, which combines beauty of design with perfection of mechanical operation. The escutcheon plate is symmetrically designed and carried out in Florentine ornamental scroll work, with provision for the addition of a name plate. The cord drive provides a perfectly smooth action, and the whole device is absolutely rigid when in operation. The calibrations are clear and illuminated by a lamp.

Price 12/6. Complete with lamp bracket, ready for attachment.

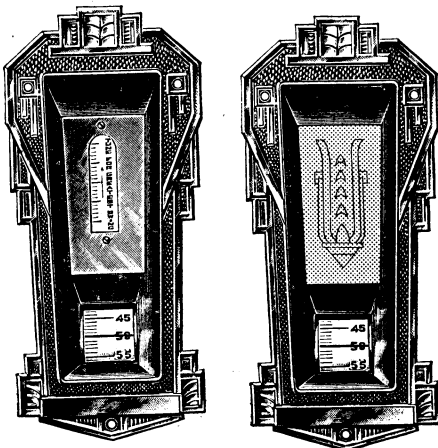

SCROLL DIAL, Type 7-11

VISOR DRUM DIAL FITTED WITH VISUAL TUNING METER

The Visor Visual Tuning Dial is the latest achievement by Radiokes designers. The escutcheon plate is artistically and symmetrically designed, beautifully finished and enriched by touches of coloured enamel. Provision is made for a name on plate. The cord drive ensures velvet smooth action, and the latest visual tuning device is incorporated. The whole piece is very rigid and can be screwed to the ganged condenser.

Price 27/6. Complete with meter, lamp bracket, and grumets.

LUXOR
DIAL

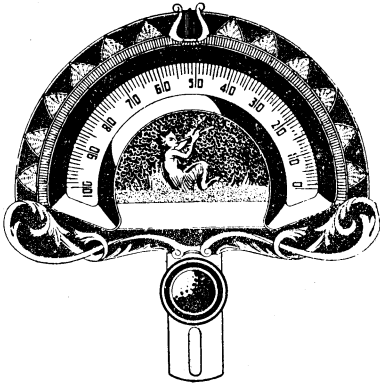

Type 7-10

LUXOR DRUM DIAL

Similar in design and finish to the Visor Drum Dial, but without the Visual Tuning Meter. The centre panel is completed with an appropriate Egyptian symbolic design.

Price, 15/-. Complete with lamp bracket, ready for attachment.

Radiokes Full Vision Type Dials

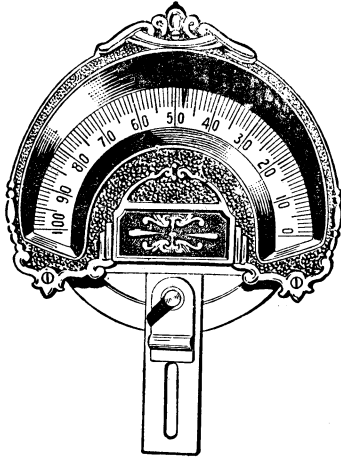

PAN DIAL, Type 7-6

The Radiokes range of Full Vision Dials provides a selection of dials which will satisfy the requirements of the most critical set builders and please the tastes of the most fastidious buyers of radio receivers. Among them are designs which will harmonise with any type of cabinet, and their mechanical excellence assures long and satisfactory service. Artistically designed, beautifully finished and built for service.

PAN FULL VISION DIAL

Equipped with travelling spotlight, friction drive, with tensioned spring to prevent slipping, and neat escutcheon. Particularly suitable for console cabinets. The scale is clearly marked, and may be obtained reading either 0 to 100 or 100 to 0. Suitable only for condenser with $\frac{1}{4}$ -inch spindle.

Price, 5/9 complete.

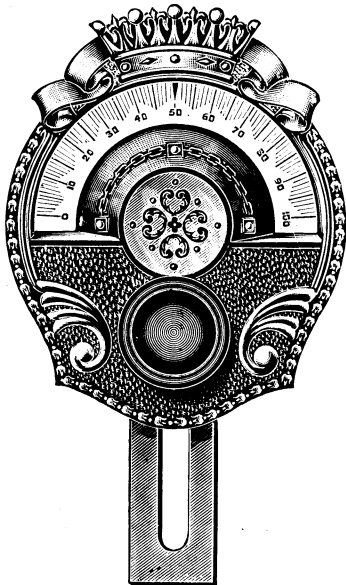

EXCEL DIAL, Type 7-8

EXCEL FULL VISION DIAL

Harmonious two-tone design, finished in Antique Silver and Florentine Bronze. Full Vision Dial. Travelling Spotlight. Single-screw Chassis Mounting. Compact size, suitable for $\frac{3}{8}$ in. or $\frac{1}{4}$ in. Condenser Spindle. New, exclusive device ensures smooth velvet-like action. Fully guaranteed against defective workmanship.

Price, 5/9 complete.

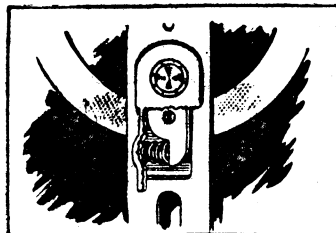

ROYAL DIAL, Type 7-9

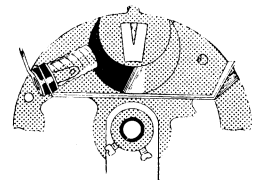

ROYAL FULL VISION DIAL

The Royal Full Vision Dial is a recent addition to the Radiokes range, designed particularly for use with midget and table model receivers, though quite suitable for any other type of set. The new exclusive high-tension friction drive ensures smooth action, and it is equipped with a travelling spotlight. Single-screw chassis mounting simplifies assembly, while assuring absolute rigidity in operation. Finished in two-tone bronze, with coloured enamelled spot in centre for artistic contrast.

Price, 5/9 complete.
