

Radio Receiver Model 532 — Superhet

All Electric 4 Valves & Rectifier

The two diagrams on this page are of two early Stromberg-Carlson receivers. Quite a number of these older sets are still in use and the circuits will be of value. Unfortunately, no data other than those included in the diagrams are available. Model 36 dates back to 1931, while Model 532 was a 1938 product.
