1932 ELECTRIC RADIO

---

# THE NEW ASTOR

---

## EXCLUSIVE FEATURES ● *in various Models of* 1932 ASTOR RADIO

### ● NEW SPOTOLITE VISUAL STATION SELECTOR.

The name of the Station you desire is seen brightly illuminated as you turn the tuning knob. Enables even the most non-technical member of the household to select any station with absolute precision.

### ● NEW ASTOR STATION ISOLATOR.

Isolates the station you wish to hear. Completely eliminates interference from every other station. Essential for districts in the vicinity of regional or broadcasting stations.

### ● NEW METAL-CLAD SCREEN GRID VALVES (by PHILIPS).

The entire freedom from internal interference and the silent operation in between stations will impress the merest novice with the revolutionary nature of this outstanding technical development in valve design. Now introduced by Astor in the NEW Aladdin and Kismet sets for the first time in Australia.

### ● NEW DYNAMIC AMPLIFIER

Entirely eliminates distortion—faithful, mellow reproduction even at the maximum, tremendous volume of the full-powered Jensen Dynamic built-in Speaker. Achieved by NEW exclusive design of Speaker to accommodate the NEW Philips Pentode power valves.

## Astor Pasha (Push-Pull)

(Fitted with Astor Station Isolator).

New tone quality, from a whisper to ball-room volume, is afforded by the new Astor Pasha, which employs giant twin amplifiers in push pull. This time-tested principle of power amplification is used by most up-to-date broadcasting stations and talkie plants. Reproduction is through the 10-inch Jensen dynamic speaker, incorporated in the Walnut Console. "Spotolite" tuning, with full-vision scale, gives automatic station selection with the new Astor Pasha.

### SPECIFICATIONS :

5 Valves, including rectifier, with two Philips E406 Super - power Valves in push pull  
Full-sized 10 inch Jensen dynamic speaker.  
"Spotolite" Patented Tuning.  
Astor Station Isolator.  
Gramo pickup terminals.  
Fitted with Philips 4 volt valves.

PRICE, complete with speaker £27/10/0

## Astor Sultan

Triple Screen Grid Interstate Receiver.

Illustrated above is the rich lowboy console of this powerful trans-continental receiver that has revolutionised interstate reception.

In the Sultan three giant screen grid radio amplifiers each incorporated in a separate tuned circuit, totally shielded; give an amplification 27 times greater than three normal valves. The new power detector with E406 super power valve in output stage ensures a tone realism of reproduction that is almost uncanny in its fidelity.

### SPECIFICATIONS.

6 Valves, including Rectifier.

Three-stages screen grid radio; power detector.

Illuminated solo-dial control.

Fitted with Philips 4-volt Valves.

Table Model, complete (speaker extra). - £29/10/-
