

**T**HIS floor model Radiola is designed to give interstate reception without interference, the single dial station selector providing extreme simplicity, while the volume control allows wide variation of signal strength. It is housed in a handsome console cabinet of laminated maple with matched doors, the cone speaker being mounted in the cabinet itself.

A console 7-valve Radiola in either battery or all-electric models; housed in a matched grained maple floor cabinet in two-tone duco.

Price—

All-Electric	-	£65
Battery	- -	£56

and manufactured by "A.W.A." 

For either battery or all-electric operation, this Radiola is identical to the console type in chassis design. The table cabinet is of matched grained maple, finished in two-tone duco.

Price—

All-Electric - £55  
 Battery - £39/10/-

FOR those desiring a table model, this Radiola is particularly suitable. It incorporates all the outstanding features of Radiola design—simplicity, economy and dependability—and at the same time offers an alternative to the more expensive console type. For use with this table model Radiola a floor pedestal may also be obtained at slight additional cost.
