RADIOLA 143

The beautiful modern cabinet will harmonize with any home interior.

ROTOVISION TUNING . . .

"Shows at a glance
the Station you want"

Features

- Improved "Twin Tuning" Rotovisor Dial with direct readings in metres, kilocycles, and call signs of "A" and "B" class stations. Duplicated upper and lower scale readings make for greater comfort when tuning in a standing or sitting position.
- Cabinet of feathered walnut veneers with decorative inlays of black bean and finished in full piano lustre.
- Cadmium plated chassis finished in two-tone iridescent lacquer. Reliable and robust components.
- Simplified battery cables.
- Low "A" and "B" battery consumption.
- Finely graded volume control.
- Improved tone control.
- Combined "A," "B" and "C" battery switch with three positions. One setting provides for operation of the set with the dial lighting lamps out, further reducing "A" battery consumption.
- Pick up jacks.
- Low noise level.
- Components specially impregnated to resist humidity.
- Circuit Details:—Superheterodyne circuit utilising Radiotrons 34 as RF Amplifier; 1A6 as Detector Oscillator; 34 as IF Amplifier; 30 as 2nd Detector; 30 as Driver, and 19 as Class "B" push-pull output. The circuit is of improved design providing ample volume without distortion, and incorporating tone control.

HISK RADIOLA

This new 6-valve battery operated Super-heterodyne Radiola, designed specially for country use, combines extreme sensitivity and brilliant tone with remarkably low "A" and "B" battery consumption.

Embodying many advanced features in design and construction, the Radiola Model 143 provides long distance daylight reception and all round performance comparable with the best electrically operated instruments.

The new "twin-tuning" Rotovisor dial is calibrated in both metres and kilocycles, marked with a full range of "A" and "B" class station call signs, and introduces a new degree of comfort and efficiency in tuning.
