# THE FISK RADIOLOLA MODEL 76

A battery operated reflex superheterodyne receiver of advanced design giving excellent interstate reception and particularly pleasing tone with most economical battery consumption.

The fully inclined instrument panel is an outstanding development for convenience in operation and the new open-faced Rotovisor dial, calibrated in metres and kilocycles and marked with "A" and "B" class station call signs, constitutes the most simple method of tuning yet devised.

The modern and beautiful cabinet of Queensland walnut veneers, with graceful lines and curves, is finished in a high gloss lustre.

27  
GUINEAS

## FEATURES:—

Fully inclined instrument panel and open faced Rotovisor dial calibrated in metres and kilocycles and marked with call letters of "A" and "B" class stations.

Improved circuits using multi-purpose valves, resulting in unexcelled efficiency.

4 Valves. Radiotron types 34, 1A6, 6B7, 38 (non-microphonic).

The combination of 6 volt and 2 volt valves allows full advantage to be taken of low noise level, tone and A.V.C. features of the 6 volt valves, with economy in "A" battery consumption.

Finely graded volume control.

Automatic volume control.

Cadmium-plated chassis finished in two-tone iridescent lacquer.

Robust and reliable components specially impregnated to resist humidity, ensuring highly efficient performance in all climates.

Condensers floated in rubber mounting to prevent microphonic noises.

Low battery consumption.

New combined battery and dial lamp control for further economical battery consumption.

Tone control.
