A Small Receiver of BIG Performance

The Fisk RADIOLETTE MODEL 24

The 5-valve table model Radiolette is charming in appearance and its design is in conformity with the modern trend in small receivers.

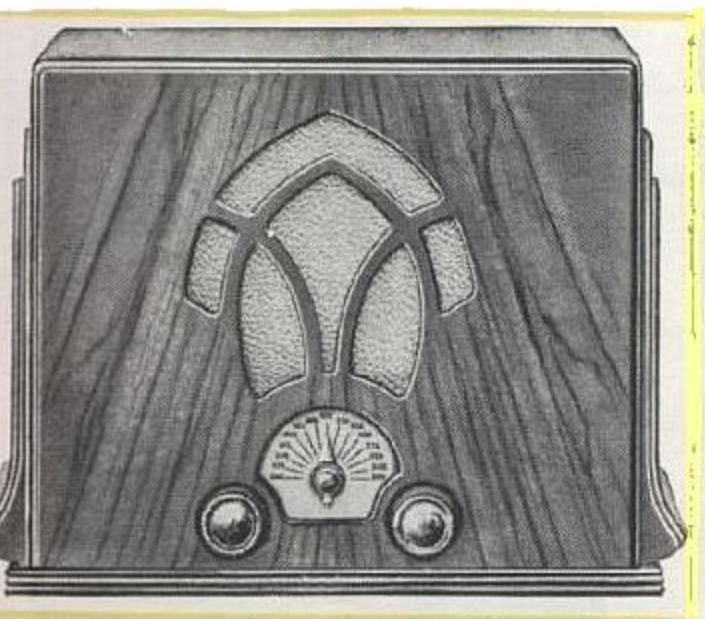

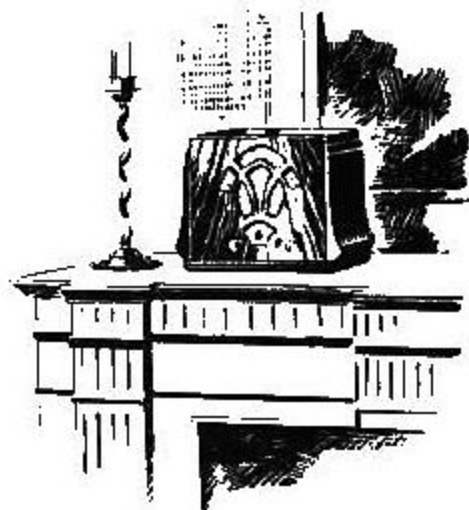

The Radiolette is small in size but big in performance, giving results equal to that of many larger sets.

It is extremely compact, occupying considerably less than one square foot of table space—taking no more room on the mantelpiece than a small eight-day clock.

It is just the thing for the den, the verandah or the week-end retreat. For a second set it is ideal, for it can be tucked under the arm and removed from room to room without any difficulty.

With its exceptional performance and sturdy construction the Radiolette is the highest grade, compact receiver in its price range to-day.

The size of the cabinet is 11½ in. wide x 5½ in. deep x 8½ in. high.

The front panel of the Radiolette Table Model is of choice figured Queensland walnut veneer, finished in a new hand-rubbed, high gloss lacquer.
