THE FISK

RADIOLETTE

TABLE MODEL 27

Though small in size, this table model Radiolette is big in performance, workmanship and dependability.

It is a full-powered five-valve superheterodyne receiver, but takes up no more room on the mantelpiece than an eight-day clock. It can be easily moved from room to room.

The cabinet is most distinctive and is attractively veneered in Queensland walnut, with a high gloss finish.

A high fidelity moving coil loud speaker, interstate reception and most pleasing tone are features of this Radiolette.

The A.W.A. Rotovisor Tuning Dial makes precision tuning much easier.

The valves are Radiotrons types 78, 6A7, 6B7, 42, 80.

With its splendid tone and exceptional performance the Radiolette Table Model is outstanding value.
