

AUDIO AMPLIFIERS 50 and 100 watt

The latest range of AWA audio amplifiers is thoroughly versatile. It includes a type for every purpose, providing facilities to meet every need in sound amplifying and distribution.

This fine equipment is designed and built to the same exacting standards of performance, engineering and quality for which the Company has established a world-wide reputation in broadcasting and communication. The attractively styled models, PA1002B, 50 watt, and PA1001B, 100 watt, are illustrated above with radio tuner PA449Y fitted. The amplifier protective cover has provision for mounting a monitor speaker.

- Excellent frequency response
- Constant voltage output
- Improved circuitry
- Choice of pre-amplifiers
- Unique output limiter
- Multi-tapped output transformer includes 70 and 100 volt lines.

Radio, record playing and speaker switching units assembled with the amplifier to form a centralised system.
