AUTO RADIO SERVICE BULLETIN.

RECEIVER INSTALLATION FOR 1938 FORD CARS 10 H.P.

The equipment for the 1938 10 H.P. Ford car is:
Control No. 3840 which is similar to the Airplane
type used on 1936 Ford Standard car with Chrome
plated escutcheon except that the cables are 19"
long and knobs Walnut to match Instrument panel.

Control fits into the center hole of Instrument
Panel after taking out the Ash Tray and the
mounting ring. It will be found necessary to
file two small recesses in the bottom of this
hole to clear the control spindles.

The set is fitted under Left Hand glove box on
dash as high as possible and the speaker is
Part No. 3811 Header-board type with cord
which goes down Left hand windshield support.
